Welcome to Neesh AI 2.0! This operational handbook walks founders through every milestone of validating a startup. From account initialization and AI Copilot discovery to crafting an irresistible hook slogan, publishing high-converting spotlights, broadcasting elevator pitch reels to the community, and collecting buyer intent.

New founders start by registering on the platform at `/signup`. This creates your dedicated founder workspace and initializes your secure Supabase authentication profile.

FOUNDER INSTRUCTIONS

- **Email Registration:** Enter your First Name, Last Name, and Work/Personal Email Address.
- **Single Sign-On (SSO):** Click **Google** or **GitHub** for instant, passwordless sign-up.
- **Email Verification:** Click your verification email link to activate your workspace and begin building.

Founder Pro-Tip / Fast-Track Access Trick: In case standard email authentication or verification links encounter inbox spam filters or delivery delays, **use Google Sign-In** to gain instant, one-click access to the platform! Google SSO bypasses link delays and directly establishes your authenticated session.

STEP 02 Signing In to Your Account

Existing founders log in directly via `/login`. Authentication tokens and user sessions are securely managed through Supabase session storage.

Figure 2.1: Secure Founder Login Interface

FOUNDER INSTRUCTIONS

- Enter your registered email and password, or authenticate with **Google / GitHub** SSO.
- The system keeps you securely logged in across browser sessions so you can seamlessly update spotlights, manage pitch reels, and monitor incoming audience signals.
- If you forget your password, click **Forgot password?** to receive a secure password reset link.

i Seamless Session Sync: Signing in with the same Google or email account automatically restores your projects, custom spotlight landing pages, audience leads, and live countdown sprint timers.

STEP 03 The Founder Command Dashboard

The dashboard (`/dashboard`) is your startup control tower. It displays active validation sprints, countdown timers, project status badges, and real-time audience views.

Figure 3.1: Founder Projects & Sprint Countdown Dashboard

DASHBOARD ELEMENTS & ACTIONS

- **Create New Project:** Click the top-right **+ New Project** CTA to launch a new validation workspace and explain your business, startup, or idea to the AI engine.
- **Project Cards:** View active sprint timers (e.g. 48-Hour Validation Sprint or 5-Day Stage 3 Sprint), project titles, and status tags (**Active** , **Draft** , **Locked**).
- **Audience Views Counter:** Real-time counter of unique audience members who have opened your spotlight or pitch.
- **Cross-Promotion Engine:** Live network to cross-promote your spotlight in other founders' "More Like This" sections.

Getting Started: Click **+ New Project** to begin. You will explain what your startup does, who it serves, and let Neesh AI guide you through validating your venture assumptions.

STEP 04 Creating a New Project Workspace

Clicking **+ New Project** launches the interactive **Create Workspace Wizard**, initiating the calibrated AI validation workflow for your venture.

Figure 4.1: Initializing the Project Workspace

WORKSPACE INITIALIZATION GUIDE

- **Initialize Venture:** The wizard creates a dedicated database workspace for your startup where all validation questions, audience signals, spotlight assets, and reels are stored.
- **Structured Progression:** You will move step-by-step from core parameters (Name, One-Liner, Sector, Stage) into the AI Copilot dialogue.
- **Sprint Timer Activation:** Once initialized and scored, your project enters its audience validation sprint with real-time countdown tracking.

Multi-Project Support: Founders can create and manage multiple ventures simultaneously. Each project maintains its own isolated spotlight page, pitch reel, feedback inbox, and validation score.

STEP 05 Entering Startup Idea Details

Define the core parameters of your venture so Neesh AI can calibrate its reality check and format your public presentation.

Figure 5.1: Startup Name, One-Line Summary, Industry & Stage Inputs

INPUT CHECKLIST & STRATEGIC GUIDELINES

- **Startup Name:** The working brand or product title (e.g., **EcoRoute AI**).
- **One-Line Hook Slogan:** Craft a concise, high-impact one-liner about your startup.
- **Sector / Industry:** Vertical classification (SaaS, CleanTech, E-Commerce, FinTech, AI, HealthTech).
- **Venture Stage:** Development status (Idea, Prototype, Pre-Revenue, Early Traction).
- Click **Start Copilot >** to enter the AI interactive validation dialogue.

★ **Critical Positioning Strategy (Hook Slogan):** *This one-liner appears directly beside your Elevator Pitch video reel in the community feed! Design your one-liner in a way that hooks audience curiosity immediately—like a captivating slogan that compels anyone discovering your reel to watch your pitch and read your spotlight.*

Neesh AI Navigator runs you through 5 modules of rigorous reality checks to eliminate bias, stress-test defensibility, and calculate value multipliers.

Figure 6.1: Neesh AI Navigator Interactive Question Dialogue

THE 5 CORE MODULES

- **Module 1 (Problem Reality):** Paint a real-world scenario where someone suffered from this problem and what went wrong.
- **Module 2 (Customer Persona & Budget):** Specific job title, willingness to pay, and cost of their current workaround.
- **Module 3 (Value Multiplier):** Measurable metrics why your approach is 10× better than existing alternatives.
- **Module 4 (Defensibility):** What stops a well-funded competitor from cloning your product overnight?
- **Module 5 (Scale Math):** Realistic transaction volumes, price points, and customer acquisition channels.

Founder Pro-Tip: Use **ChatGPT, Claude, or your preferred LLM** loaded with your complete startup pitch or business plan to help answer questions and complete all 5 modules with deep, rigorous data.

Mandatory Pre-Submission Review: *Read and verify every answer once before submitting!* Your responses are synthesized into public sections that appear directly on your live Spotlight page for visitors and investors to see.

STEP 07 Phase 1 Validation Reality Check & Score

Your answers are synthesized into a holistic market-readiness score with an actionable dimensional diagnostic report.

WORKSPACE HUB FEATURES & REPORT INSIGHTS

- **Aggregate Score:** Market-readiness gauge (e.g. **82% Validation Score**) measuring overall venture viability.
- **Key Dimension Gauges:** Core Value Proposition, Market Size & Demand, Defensibility, and Go-to-Market Readiness.
- **Sidebar Navigation:** Instant access to Spotlight Editor, Elevator Pitch, Audience Inbox, and Audience Insights.

 **Action Plan for Idea-Stage Ventures:** Based on your answers, you will receive a detailed analytical report. *If your venture is at the Idea stage, pay close attention to the Critical Segments!* Work on and strengthen any low-scoring dimensions (e.g., customer budget, defensibility, unit economics) before scaling outreach.

The Spotlight Editor (`tab=spotLight`) lets you design a high-converting public landing page to capture customer intent and build your waitlist.

Figure 8.1: Spotlight Editor Interface

CUSTOMIZATION CONTROLS & BEST PRACTICES

- **Catchy Hero Cover Image:** Create a catchy cover image using ChatGPT / DALL-E based on your startup. *Replace the existing default cover image first* to make your spotlight visually stand out!
- **Flexible Content Sections:** Freely add, edit, or remove content sections based on your preferences.
- **Rich Media (Images & Videos):** Add product screenshots, diagrams, or demo videos to help your audience understand your startup clearly.
- **Feedback Options:** Add custom survey questions if you need to gather specific details, requirements, or contact info from prospective users.
- **Interest Tags:** Add clear 1-to-2 word requirement tags (e.g., `Co-founder` , `Customers` , `Investors`). Save your tags and save the whole spotlight!

When visitors open your spotlight link (`/p/:slug`), they experience your verified value proposition, submit interest, and engage directly.

Figure 9.1: Live Visitor Perspective on Public Spotlight

AUDIENCE INTERACTION POINTS

- **Deep-Dive Problem & Solution:** Visitors read your verified value proposition, metrics, and roadmap.
- **Glowing Intent Button ("Neesh It"):** One tap allows visitors to express direct buyer interest and join your early adopter list.
- **Interactive Feedback Form:** Prospective customers can submit in-depth ratings, feature requests, and contact details.

Platform Notice on Chatbot: *The AI Chatbot is currently undergoing algorithmic retraining and may not work as expected.* Founders and visitors should rely on the Glowing Intent Button, the Feedback Survey Form, and direct contact details on the Spotlight page for audience interactions.

Short-form video reels generate 5× higher engagement. Upload your 30s to 1-minute pitch in the **Elevator Pitch** tab and broadcast it to the global community.

Figure 10.1: Elevator Pitch Reel Featured in the Community Feed

VIDEO CREATION & PROMOTION STEPS

- **Pitch Creation (30s to 1 min):** Go to the Elevator Pitch tab. Create a punchy 30-second to 1-minute video pitch based on your business, startup, or idea.
- **Upload & Save:** Upload your video file (`.mp4` , `.webm` , `.mov`) and click **Save Pitch**.
- **Push to Cross-Promotional Engine ⚡ :** Click **Push to Engine** to publish your pitch to the global discovery space, where everyone can browse your pitch and spotlight just like Instagram Reels or TikTok!

Video Creation Pro-Tips:

- Record a natural founder selfie video pitching the problem and solution directly.
- Use **Google Gemini** to generate sharp pitch scripts and storyboards.
- **NotebookLM (Best Suited):** Upload your startup notes/deck to Google NotebookLM to generate short-form audio/video discussion summaries—ideal for high-quality, professional pitches!

Share your unique project link across external channels, track incoming leads in real-time, and qualify buyers into Gold, Silver, and Bronze tiers.

Figure 11.1: Stage 2 Audience Sprint Targets & Qualification Progress

VIRAL MULTI-CHANNEL SHARING & INBOUND LEADS

- **Share Button on Overview Page:** Go to the **Overview** page and click the **Share** button to copy your unique project link.
- **Promote Everywhere:** Share your link across WhatsApp groups, Instagram bio/stories, Reddit (r/startups), X (Twitter), LinkedIn, and founder communities.
- **Inbound Approaches:** Visitors who open the link can view your pitch reel and spotlight. If interested, they will submit interest and approach you directly!
- **Audience Insights Dashboard:** Monitor all incoming visitor counts, intent submissions, and feedback responses in real-time on the **Audience Insights** page.

VALIDATION SPRINT TIERS

- **Bronze (Early Adopters):** Visitors who clicked the interest button and signed up.
- **Silver (Qualified Feedback):** Visitors who provided detailed answers or survey input.
- **Gold (High-Intent Buyers):** Prospects confirming pilot budgets, orders, or partner calls.
- **Sprint Auto-Advance:** Achieve **5 Gold + 10 Silver + 15 Bronze** targets to auto-qualify for Stage 3 Pilot MVP status!
